

DWA_03.5 Knowledge Check_DWA3.2

1. User story(ies) in Gherkin syntax for the "+" button.

Scenario: User adds events to a calendar using the "+" button

Given the user are on the calendar screen

When the user press on the "+" button a new tab should open

Then the app should display a new form to add the event

And the user can add new details to the event

When the user submit the form with the new event

Then the app should add the new event on the calendar

And make it visible on the calendar

2. User story(ies) in Gherkin syntax for the "-" button.

Scenario: User remove events from their calendar with the "-" button

Given the user is viewing their calendar

And their is events listed on the calendar

When the user selects an event from their calendar

Then the app should display the event overlay

When the user presses on the "-" button

Then the app should confirm with the user if they want to remove the event

When the user confirms the removal

Then the event should be deleted from the calendar

And the calendar should update to show the removal of the event
